Student of the Week

Jesse Leegwater

Jesse's favorite Bible story is
The Ten Commandments

His favorite food is
Quesadillas.

Black is his favorite color.
Shiloh

is his favorite book.

In his spare time

Jesse enjoys
playing video games. 

Jesse was chosen for
Student of the Week
for showing the following
“Fruit of the Spirit”
Helpfulness
Perseverance
Great Job Jesse !!

Thank you !!!

Our annual Harvest Festival is October 18th. We are already starting preparations. Our class booth is the Wheel of Prizes. We have taken inventory and now need to purchase additional prizes.

We are asking each family to send in \$10.00 (cash) to help cover the cost of prizes. Thank you for sending in your donations, and if you have not, it is not too late.

We are also looking for parent volunteers to run the booth. Let us know if you are available to work for an hour on the

day of the festival. Please contact Myra Adams, Gayle Moussa, or send me an e-mail.

Hands on Science

In continuation of our study of plants, we are doing an experiment using celery and colored water.

This experiment demonstrates how a plant uses vascular tissue to transport water from its roots, through the stem, and to the leaves.

Students work in Science Groups. Each experiment the students rotate to a new "job."

These jobs include:

Manager, Materials Organizer,
Principal Investigator,
Recorder, and Reporter.

Students are graded on their participation as well as their Lab Results.
